Understanding Avast Subscriptions on iPhone

Avast offers a range of iOS-compatible services like **Avast Mobile Security**, **Avast SecureLine VPN**, and **Avast Cleanup Premium**. Many of these are managed through **Apple's App Store**, meaning the billing and subscription management are handled by Apple — not Avast directly. ☎ **1-866-571-9373**

However, if you originally subscribed using your **Avast Account**, then cancellation requires logging in through Avast's website or contacting the customer service team for help.

But what happens when you don't have access to your Avast account anymore? That's where this article helps — with clear, secure, and verified steps to cancel your subscription from your iPhone, even without signing in. ☎ **1-866-571-9373**

1 Identify Where You Purchased Your Avast Subscription

Before starting the cancellation process, determine **where you originally purchased your subscription**. This matters because the cancellation method depends on your purchase channel: ☎ **1-866-571-9373**

- **Through the Apple App Store (iTunes billing)** — Manage via your Apple ID.
- **Directly from Avast.com** — Managed through your Avast Account.

- **Through an authorized reseller** (like Digital River or Nexway) — Managed via the reseller's confirmation email. ☎ **1-866-571-9373**

If you're unsure, you can look for the **confirmation email** you received after subscribing. It will contain your purchase reference number and the name of the billing source.

If you can't find it, call ☎ **1-866-571-9373**, and our customer care experts can help track your order based on your email or device information.
